

NEBOSH Certificate NGC1/7 Monitoring, review and audit

Revision questions

- Q1** *List some of the indicators that could be used to measure the effectiveness of the safety policy.*
- Q2** *Just checking (again) ... you are able to outline the structure of HSG65 aren't you?*
- Q3** *Explain why accident and illness records may give a very limited indication of the effectiveness of the health and safety policy.*
- Q4** *Following an incident or an inspection, required actions need to be prioritised; for a workplace of your own choosing, give examples of required actions that might fall into the categories:*
- *high priority, immediate action required*
 - *medium priority, action required within weeks*
 - *low priority, action required within months*
- Q5** *The risk assessment requirements in MHSWR are general, applying to all hazards that may be encountered in the workplace; give examples of legislation which makes specific assessment requirements.*
- Q6** *Write a few words about statutory inspections.*
- Q7** *Under The Safety Representatives and Safety Committee Regulations 1977 safety representatives to conduct inspections in which circumstances?*
- Q8** *Outline the distinction between a safety survey, a safety tour and safety sampling.*
- Q9** *Why would even the most thorough inspection of the whole workplace not constitute an audit?*
- Q10** *Create a definition of a health and safety audit.*
- Q11** *Outline the circumstances in which persons outside the company might be involved in undertaking aspects of a safety audit.*
